Summary

An information technology graduate student who is adept at multitasking, problem-solving, and leadership. I can provide significant solutions because to my background in project management, my knowledge of AI and mobile app development, and my aptitude for strategic planning. I work effectively both individually and together, always learning new things and changing with the times. My passion for education and trying out new technologies puts me at the forefront of the IT industry. Contributing to your prestigious organization excites me.

Projects
